Project Team Lead

Part-time

Jun 2025 - Present · 1 yr

Cedar Park, Texas, United States

- Contributed to development of a VEX-focused robotics simulation platform designed to expand upon the original FTC-based VRS system.
- Helped develop full-stack simulation and tooling features for virtual robot testing, debugging, and competitive robotics workflows.
- Worked on modular CAD libraries and simulation infrastructure to support efficient robot prototyping and design.
- Collaborated with software, UX, and firmware teams to improve platform usability and performance.
- Supported platform growth and community adoption through feature development, documentation, and user feedback integration.
- Contributed to a platform used by 50,000+ monthly users within the competitive robotics community.

Skills: Technical Project Leadership, React Native, +3 skills

Summer Intern

Internship

May 2025 - Jun 2025 · 2 mos

- Contributed across software, CAD, testing, and documentation workflows as part of a cross-functional robotics development team.
- Debugged and optimized robotics codebases to improve simulator reliability and performance.
- Assisted with CAD modeling and virtual robot design for competitive robotics applications.
- Mentored FTC robotics teams on autonomous programming, control systems, and competition strategy.
- Helped develop a React Native-based interface for simulator access, telemetry visualization, and team collaboration.
- Collaborated on projects spanning robotics simulation, frontend development, and engineering education initiatives.

Skills: HTML/CSS, SDKs, +9 skills

On-site

Chief Executive Officer

May 2026 - Present · 1 mo

- Lead a student-run organization focused on business, technology, and hands-on engineering initiatives.
- Oversee operations, branding, project management, and cross-functional student collaboration across multiple technical projects.
- Spearheading development of autonomous delivery initiatives integrating robotics, software, and real-world operational workflows.
- Working with school leadership and administration to expand the organization into an accredited CTE-aligned program.
- Create opportunities for students to gain experience in leadership, entrepreneurship, software development, and engineering through project-based learning.
- Mentor members in technical problem-solving, teamwork, and professional development within a collaborative student-led environment.

Skills: Team Leadership, Team Motivation

LightSpeed(IT) Director

Mar 2025 - Present · 1 yr 3 mos

Round Rock High School

- Led a team of students in improving school e-commerce and digital store operations through technology-driven solutions and collaborative project management.
- Designed and deployed a custom iOS inventory management app with barcode scanning and real-time database synchronization to improve stock tracking accuracy and reduce manual entry errors.
- Mentored new members on inventory systems, product management workflows, and operational best practices.
- Oversaw technical improvements to the online platform and supported scaling operations to meet increasing student demand.
- Coordinated with delivery teams and special education staff to improve workflow efficiency and day-to-day operations.
- Fostered a culture of initiative, accountability, and hands-on technical learning within the organization.

LightSpeed(IT) Member

Nov 2024 - Mar 2025 · 5 mos

Round Rock High School

- Contributed to redevelopment of the school store's e-commerce platform by reformatting, re-photographing, and updating 400+ product listings to improve catalog quality and accuracy.
- Assisted with Stripe integration to support Apple Pay and Google Pay for improved checkout accessibility and payment flexibility.
- Developed frontend UI enhancements and CSS animations to improve user experience and platform responsiveness.
- Collaborated with administrators, CTE coordinators, and special education staff to support a delivery-based ordering system that improved operational efficiency and inclusivity.
- Assisted with backend inventory verification, product organization, and streamlined ordering workflows within a

student-led retail environment.

HallHop logo
Founder

HallHop · Self-employed

Nov 2024 - Present · 1 yr 7 mos

- Built and deployed a full-stack Chrome extension and Flask-based REST API to digitize hall pass management and support real-time student tracking workflows.
- Optimized Home Access Center scraping infrastructure, improving API response performance by approximately 7× for schedules, grades, and assignment retrieval.
- Integrated Supabase for automated check-in/check-out logging, session recovery, and multi-user management using JWT authentication and row-level security.
- Designed backend systems with scalability and FERPA-conscious data handling in mind to support large-scale student usage across campuses.
- Supported onboarding and platform adoption for 4,000+ students, with infrastructure planning for expansion to 10,000+ users.
- Collaborated with school administrators and IT staff to improve operational efficiency, compliance, and user experience.

Software Engineer

Transforze · Part-time

Nov 2025 - Present · 7 mos

Cedar Park, Texas, United States · Remote

- Designing and developing an AI-native, multi-tenant CRM platform focused on agent-driven business operations and workflow automation.
- Building backend infrastructure with Supabase, PostgreSQL, Row Level Security (RLS), and Edge Functions to support secure multi-company data isolation and auditable AI workflows.
- Developing streaming AI pipelines for structured business plan generation, iterative refinement, and automated operational task management.
- Architecting the frontend with React Admin and TypeScript to support multi-workspace management, onboarding systems, and scalable enterprise workflows.
- Exploring production-oriented concepts in agent safety, real-time AI UX, and deterministic AI execution within operational systems.
- Integrating scalable authentication, permissions, and workflow orchestration patterns designed for future analytics, communication, and automation features.

Information Technology Infrastructure, PostgreSQL and +6 skills

Website Manager

Lone Star Ridgebacks · Contract

Jun 2025 - Dec 2025 · 7 mos

Cedar Park, Texas, United States · Remote

- Redesigned and modernized the Lone Star Ridgebacks website (<https://www.lonestarridgebacks.com/>) to improve user experience, mobile responsiveness, and SEO performance.
- Implemented custom animations, interactive image galleries, and structured data markup to enhance engagement and search visibility.
- Developed secure Wix-hosted document preview systems to replace external file viewers and improve browsing experience.
- Collaborated closely with the client to align branding, streamline navigation, and create a clean, user-friendly interface tailored to dog adopters and breeders.
- Optimized site structure and frontend performance to support accessibility, responsiveness, and long-term maintainability.

Online Payment, HTML/CSS and +5 skills

LPL Financial logo

Machine Learning Intern

LPL Financial · Internship

Jun 2024 - Sep 2024 · 4 mos

Austin, Texas, United States · Remote

- Contributed to development of an AI-powered chatbot designed to streamline client interactions and improve user experience within a financial services environment.
- Assisted with training, testing, and evaluation of conversational AI models to improve response quality and automation efficiency.
- Worked on prompt refinement, data handling, and conversational workflow optimization for real-world business applications.
- Gained hands-on experience with applied machine learning and AI integration in enterprise financial technology systems.

Machine Learning, Python (Programming Language) and +1 skill

Best brains logo
Academic Tutor

Best brains · Part-time

Oct 2022 - Jan 2023 · 4 mos

Austin, Texas Metropolitan Area · On-site

- Volunteered as a tutor supporting elementary and middle school students in mathematics, reading, and writing through one-on-one and small-group instruction.
 - Adapted teaching strategies to accommodate diverse learning styles, including neurodiverse students and students with disabilities.
 - Collaborated with instructional staff to monitor student progress and maintain an inclusive, supportive learning environment.
 - Helped students strengthen foundational academic skills while building confidence, communication abilities, and long-term learning habits.
-

Education

Round Rock High School

Aug 2023 – Mar 2027

Grade: Senior

Activities and societies: DECA • Mu Alpha Theta • Round Rock High School CO-OP • Cross Country • Student Council • National Spanish Honor Society • VEX Robotics

Academy:

Science, Technology, Engineering & Mathematics (STEM) and Business & Industry Academy

Relevant Coursework:

Advanced Computer Science I • AP Precalculus • Introduction to Engineering Design • Principles of Engineering • AP Seminar • TAG Advanced English II
