

Professional Experience, Projects, Education & Certifications

Projects & Research

FTC Illinois Mentorship

Jun 2025 – Present

Associated with Virtual Robot Simulator

- Provided technical mentorship and programming guidance to multiple FTC robotics teams.
- Assisted with debugging, hardware integration, sensor calibration, and FTC SDK implementation.
- Supported computer vision and AprilTag detection workflows for autonomous navigation.
- Helped optimize robot performance, match strategy, and code reliability through iterative testing.
- Simplified advanced robotics concepts to strengthen technical confidence among student team members.

Skills: *Mentoring, FTC SDK, Java, Computer Vision*

Research Project @ Texas State University

Jun 2025 – Present

- Contributed to a behavioral research project analyzing composting practices among 600+ college students.
- Assisted with statistical preprocessing and dataset cleaning workflows.
- Applied Structural Equation Modeling (SEM) techniques to evaluate sustainability behavior predictors.
- Implemented multiple imputation methods for handling missing data.
- Co-authored a research manuscript focused on sustainability-related decision-making.

Skills: *R, Structural Equation Modeling, Data Cleaning, Qualitative Research*

Round Rock High School E-Commerce

Feb 2025 – Present

Associated with Round Rock High School Co-Op

- Contributed to modernization of the school store's e-commerce platform.
- Updated and reformatted 400+ product listings to improve accessibility and navigation.
- Assisted with Stripe integration supporting Apple Pay and Google Pay.
- Developed CSS animations and frontend layout enhancements.
- Collaborated with staff and special education teams to support inclusive ordering workflows.

Skills: *E-Commerce Optimization, UI/UX, Stripe, Frontend Development*

Meals for Students

Mar 2024 – Nov 2024

- Researched food insecurity affecting students across Central Texas.
- Designed and launched a Google Sites platform connecting students with meal assistance resources.
- Created outreach materials using Canva and social media platforms.
- Contributed to initiatives focused on reducing stigma around food insecurity.

Skills: *Python, JavaScript, Canva, Community Outreach*

Inventory Counter iOS App

Mar 2024 – May 2024

Associated with Round Rock High School Co-Op

- Designed and developed a custom inventory management mobile app using React Native.
- Implemented barcode scanning and real-time database synchronization.
- Built workflows supporting manual and automated inventory counting modes.
- Improved operational efficiency and audit speed through mobile-first tooling.

Skills: *React Native, Mobile Development, Barcode Systems, UI/UX*
